# Internet Safety: List of Resources

[www.es-es.net/2.html](http://www.es-es.net/2.html) My site has a lot of resources for parents and teachers. I have documents you can download that explain everything from how to secure your home PC to detailed explanations of social networking sites. I also have step by step instructions for checking your computer history to see where people have been surfing, how to use Google to find out what is listed about your family online, Internet safety tips, Internet terminology, and some suggested software. I also have some step by step guides on securing your home wireless connections and some examples of computer use agreements. Download Super WinSpy to see all the websites that have been visited online from your computer.
